

MOVIAM

WHY MOVIAM?

Native App Development

We deliver the best device fidelity, user experience and device specific features

Enterprise Mobility Solutions

We implement mobile platforms that are secure, robust and user-friendly, with excellent understanding of enterprise processes

Best User Experience

There is more to an app than just a "WOW" the interface. MOVIAM creates that keep the user interaction at the center of design and implementation. We adopt a < 3 sec end to end interaction rule across our native & responsive app platforms

Cross Platform App Development

We rapidly develop and deploy mobile apps on several mobile platforms

Mobile App Strategy

Interaction is core of our mobile strategy. We build apps to delight end users across all the major platforms iOS, Android and Windows. Our special focus on interaction design with our Flucid design labs ensure the most user centric, interactive and intuitive apps that increase stickiness and reduce uninstall rates

MODES OF ENGAGEMENT

We Strategize

We work very closely with our customers to incorporate their business & usage strategy coupled with our experience in consumer behavioral based design to develop the strategy & plan

We Design

Looks can be deceptive. When we think, we think beyond just looks; we think usability

We Engineer

Be it native iOS, Android or Windows app; or a crossplatform responsive web app or secure backend? If you want the best, we can build it for you
